

Mission Statement

Desal Supplies mission is to be the UK and Ireland leading supplier of Reverse Osmosis membranes, Nanofiltration membranes, Ultrafiltration modules, speciality chemicals, pumps and associated equipment to water treatment and process engineering companies.

We endeavour to understand the needs of our customers and respond accordingly, providing high quality products to original equipment manufacturers in water treatment industries.

Desal Supplies are committed to building mutually beneficial and lasting relationships with customers and suppliers alike.

Our principle business is the supply of components for water treatment plants used primarily for the desalination and purification of water. These products include Reverse Osmosis membranes, Nanofiltration membranes, Ultrafiltration modules, Ion exchange resins, high pressure seawater pumps, filtration products and speciality chemicals for membrane processes.

We distribute products from key players in the industry, including:

In order for the business to succeed, we must ensure that our staff are highly committed and motivated, we have therefore established a culture that supports our team so they can provide service to our customers.

To culture involves:

- communicate openly and honestly in all dealings in order to develop an atmosphere of trust,
- undertake joint problem solving with a no blame culture,
- listen to and respect everyone's point of view,
- pro-actively develop people and the team,
- identify problem areas and concerns early, in order to agree a common way forward,
- celebrate success.
